Department of Information Technology/ Artificial Intelligence and Data Science

Summer Project

Project Title

Presented By:

1. Enrollment No[Name]
2. Enrollment No[Name]

Supervised By:[Supervisor's
Name & Details (if applicable)]

Introduction

- Briefly introduce the project topic, its relevance, and objectives.

Problem Definition

- Clearly define the problem or need that your project addresses.
- Provide context or background information.

Motivation

- Briefly define the motivation behind selecting this problem.
- Discuss identified limitations of existing work/methods.

Methodology

- Explain the approach you will take to solve the problem, including tools and technologies.
- Break down into front-end, back-end, and system architecture if applicable.
- Include a system diagram or flowchart.

Technologies Learned

- Describe your exposure to any other relevant tools/technologies
- Brief description of how you used this technology
- Description of your experience with the technology

Results and Implementation (or Working Demo)

- State the expected results of your project.
- Highlight the impact or significance of these outcomes.

Timeline Chart for Project Work

- Present a timeline chart outlining key milestones and deadlines for your project.
